

Sirichada Wattanasiritanawong

AI & Computer Engineering Student

✉ swattan@cmkl.ac.th 📍 Bangkok, Thailand 🌐 sirichada 🔗 sirichada-w-916518260

Education

CMKL University (Carnegie Mellon – KMITL), AI & Computer Engineering (AiCE) Bangkok, Thailand
Aug 2023 – June 2027

University of Nevada, Las Vegas, College of Engineering International Program Nevada, USA
Aug 2025 – Dec 2025

Experience

CMKL University, Research Assistant Bangkok, Thailand
Aug 2025 – present
1 year 1 month

Investigating "forward planning ahead" behavior of smaller LLMs through circuit tracing, supervised by Dr. Pakpoom Buabthong.

- Replicated Anthropic's rhyming experiment across Gemma (270M, 1B, 4B) using circuit tracing and attribution analysis to identify behavioral differences in implicit reasoning capacity.
- Analyzing top feature activations in smaller models to distinguish mechanistic pathways underlying correct vs. incorrect rhyming structure.

University of Nevada, Las Vegas, Student Exchange Research Intern Nevada, USA
Aug 2025 – Dec 2025
5 months

Investigated the impact of database architectures (MySQL, MongoDB, Redis) on real-time data streaming and ML performance for robotic motion prediction, supervised by Dr. Venki Muthukumar.

- Integrated relational and non-relational databases with a streaming ML pipeline, enabling real-time ingestion into a Keras LSTM model with TensorFlow backend.
- Built end-to-end data flow from LeRobot SO-101 and Atom S5 sensors through Kafka, Spark, and ML inference modules.

CMKL University, Undergraduate Researcher Bangkok, Thailand
July 2024 – Dec 2024
6 months

Conducted systematic literature review of 700+ generative AI ethics papers to map research landscape and identify emerging themes, supervised by Asst. Prof. Justin Paulsen.

- Compared topic modeling techniques (BERTopic, LDA, Top2Vec) to create clusters and visualize citation graph.

Advanced Info Services (AIS), Data Analyst Intern Bangkok, Thailand
June 2025 – July 2025
2 months

- Built interactive Databricks dashboards using SQL and Python to track campaign metrics and customer engagement.
- Automated data extraction from Thai demographic reports using Python (PyPDF2, pdfplumber).

PathSense (Hackathon Team for AIS Jump Thailand Hackathon 2024), Project Coordinator & UX/UI Designer Bangkok, Thailand
Aug 2023 – Feb 2026
2 years 7 months

- Developed an AI-powered obstacle detection device for visually impaired individuals; awarded first place at AIS Jump Thailand Hackathon 2024.
- Designed accessible user interface adhering to WCAG standards based on user interviews with visually impaired individuals.
